

# Haden Young

---

## BT Call Centre, Lincoln

The call centre is a 3,300sq metre two-storey structure with large open plan offices on the ground and first floors and will accommodate 500 employees.

Haden Young secured the £1.2 million Design and Construct order for Mechanical and Electrical services.

The open plan and office areas are provided with VRV comfort cooling systems, with close control air conditioning units serving the communications room, toilet ventilation and domestic water services.

The electrical services included general lighting and power, UPS system with stand-by generation for essential services,

as well as containment systems for IT and Data cabling, fire alarms and external lighting.

This was a fast track project with the services being completed in 10 weeks.
