

Barnet General Hospital, Accident & Emergency London

Haden Young was responsible for the design development and installation of the Mechanical Services to the new Phase 1a building on the Barnet General Hospital site

The first phase of the development included the Accident & Emergency Department, and a new maternity unit.

Haden Young worked closely with the Zisman Bowyer site team to complete the design development to the new hospital on time and to budget.

The value of the Mechanical Services Contract was £6 million.

The new hospital building included provision to link into further hospital blocks to be developed on the site

The scheme is the first and reconfiguration phase of the redevelopment of the whole site
