

Supply Chain Management Policy

It is our objective to create and develop opportunities to work closely with our sub-contractors and suppliers to mutual advantage, so that together we can deliver the best value solutions for the benefit of our clients.

Statement of Intent

The cornerstone of our strategy to implement our Policy is the careful selection of a limited number of suppliers and sub-contractors with whom we can develop an ever-closer working relationship.

Our position in the Supply Chain will influence how and to what extent we can add best value for our clients.

We will be able to manage and deploy our supplier and sub-contractor base to maximum mutual benefit by restricting our selection to our Preferred Lists. This we will do wherever possible and particularly in circumstances where we are able to influence the selection process, such as in the case of:

- Negotiated Contracts
- Two-stage Tenders
- Early Appointment
- Design Responsibility
- Framework Agreements
- Cluster Leadership
- Partnering Arrangements
- Alliances

In circumstances, where we have less control over the selection process, we will endeavour to provide our preferred suppliers and sub-contractors with the opportunity to secure the major part of our available business.
